DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2-24-04 has been entered.
2. Applicant's amendments filed 12-30-03 have been received.
3. Claims 3, 4, 10, 11, 18-32, 34-35 and 43-46, 48-50 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 22.
4. Claims 1, 2, 5-9, 13, 16-17, 33, 36-42 and 51 are under consideration.
- 5.

Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Specifically the application fails to comply with CFR 1.821(d), which states:

(d) Where the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO: " in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

The specification and claims disclose nucleotide and amino acid sequences (for example see claims 7-9, specification on pages 8-10 etc.). However, these

Art Unit: 1632

sequences are not identified by sequence identifiers as required for applications containing nucleotide/amino acid sequences.

For compliance with sequence rules, it is necessary to include the sequence in the "Sequence Listing" and identify them with SEQ ID NO. In general, any sequence that is disclosed and/or claimed as a sequence, i.e., as a string of particular bases or amino acids, and that otherwise meets the criteria of 37 CFR 1.821(a), must be set forth in the "Sequence Listing." (see MPEP 2422.03).

For the response to this office action to be complete, Applicants are required to comply with the Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Claim Rejections - 35 USC § 112

1. Claims 1, 2, 5-9, 13, 16-17, 33, 36-42 and 51 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention for reasons of record set forth in the previous office action of 11-08-02 and 7-30-03.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1, 2, 5-9, 12-17, 33, 36-42 and 51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention for reasons of record set forth in the previous office action of 11-8-02 and 7-30-03.

Art Unit: 1632

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 2, 5, 7-9, 13, 16, 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites the limitation "the gene mutated animal according to claim 1" in line 1. There is insufficient antecedent basis for this limitation in the claim because claim 1 does not recite such a limitation.

Claim 5 is vague and indefinite because it is not clear as to which presenilin-1 protein is being referred by the term "a presenilin-1 protein."

Claims 7-9 are vague and indefinite because it is unclear as to what is meant by "a DNA sequence encoding around an amino acid at position 213.....mutated."

Claim 13 is vague and indefinite because the metes and bounds of the phrase "induces the production of amyloid b protein in an amount sufficient to form a progressive neural disease in a peripheral portion of the cerebral cortex" are not clear.

Claim 16 recites the limitation "wherein the presenelin-1 gene is transferred by homologous recombination" in line 2. There is insufficient antecedent basis for this limitation in the claim because claim 1 does not recite transfer of presenelin-1 gene.

Claim 17 is indefinite because the metes and bounds of the terms "a brain" and "sufficient to cause affected behavior in a memory learning test" are unclear.

4. No claim is allowed.
